

# SIMPLE, STRAIGHTFORWARD INSTALLATION

---

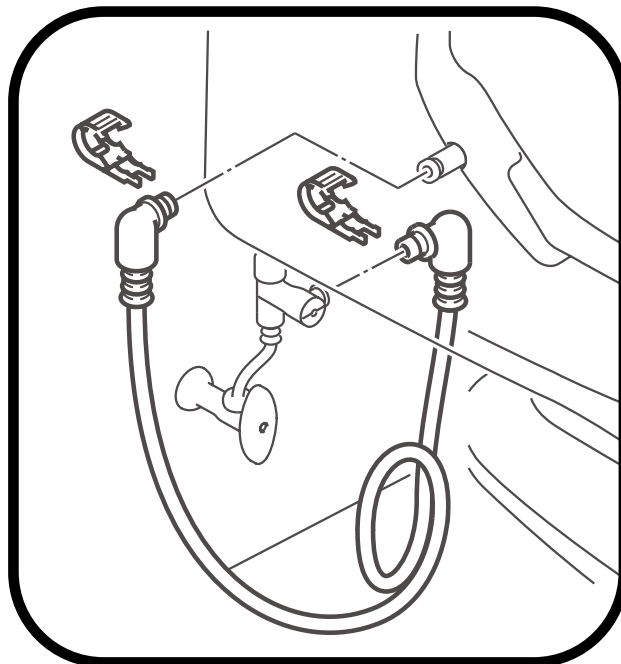

The Luxury Lavage LUSCENCE is designed to fit standard U.S. toilet dimensions, both rounded and elongated. And it is designed to fit better because the water tank is mounted behind the seat, not on the side like other models sold in the U.S. Installation is in four simple and straightforward steps.

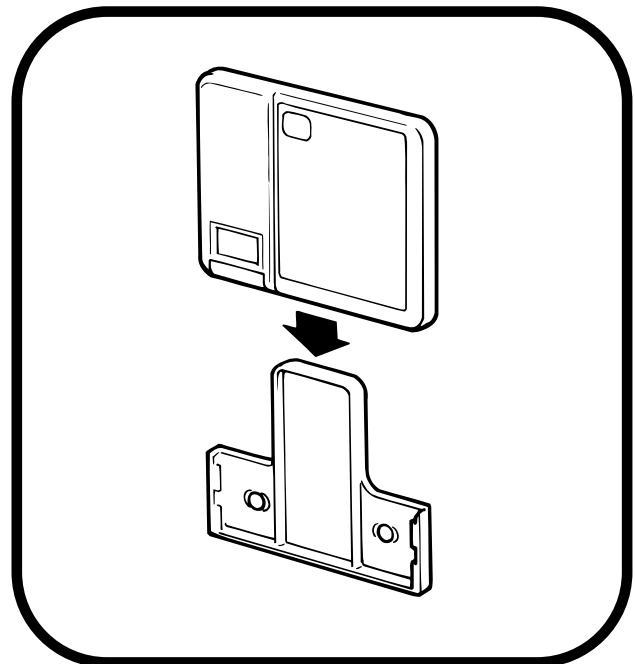

**1** Install the junction valve to the water supply.

**2** Install the seat body.

**3** Connect the water supply.

**4** Install the remote unit.
